BANK, R.A., FALKNER, G., FALKNER, M. & NEUBERT, E., 2019. The malacological publications of Jules-René Bourguignat: a bibliography. – *Basteria* 83 (1-3): 59-90. Leiden.
Published 6 April 2019

An overview is given of the malacological papers published by the Frenchman Jules-René Bourguignat (29.VIII.1829 – 3.IV.1892). Because of the Principle of Priority, special attention is given to publication dates, as Bourguignat introduced > 2500 taxa in the ‘Golden Age’, a period in malacology in which many new species were discovered. Five portraits of Bourguignat are reproduced, and reproductions are provided of the rare plates 13-15 of the 1880 fascicule of his *Matériaux sur les Acéphales*. Publication dates are given for the three journals published by the Société Malacologique de France.

Key words: Bourguignat, Nouvelle École, malacology, Gastropoda, Bivalvia, bibliography, publication dates, history.

INTRODUCTION

One of the most prolific authors with respect to malacology in the nineteenth century was the Frenchman Jules-René Bourguignat (29 August 1829 Brienne-Napoléon – 3 April 1892 Saint-Germain-en-Laye). Despite his gigantic oeuvre, only modest obituaries were published in malacological journals (Ancey, 1892; Kobelt, 1892; Crosse, 1893). That was

not without reason, as Bourguignat was already during his lifetime a highly controversial person. He established the Nouvelle École as opposed to the ‘Old School’ and he and his followers created thousands of new ‘species’, which disrupted French continental malacology for several decades (Audibert & Breure, 2017: 20).

Bourguignat published his first paper at the age of 22 years in 1852 in the third volume of the *Journal de Conchyliologie* (not 23 years as mentioned by Dance, 1970a: 66). A year later, Sauveur Petit de la Saussaye (1792-1870), the editor of the journal, resigned after having a dispute with Bourguignat about the anomalous nomenclatural procedure used by the latter. The journal ceased, but was two and a half years later (1856) again established with Paul Fischer (1835-1893) and Chevalier A.-C. Bernardi (?-1863) as its editors (not one year later as mentioned by Dance, 1970a: 69). Bourguignat did not publish in the *Journal de Conchyliologie* anymore after 1853; the journal itself ceased in 1979 after finishing its 115th volume.

In 1853, Alcide d’Orbigny (1802-1857) obtained the first Chair of Palaeontology in the Muséum national d’Histoire naturelle in Paris; in the same year he (remarkably!) hired Bourguignat to become his preparator. After the death of d’Orbigny, Bourguignat ended his duties in the Museum in 1860. He was succeeded by the above mentioned Paul Fischer, a malacologist who already fell early into disfavor by Bourguignat. Fischer was not the only person who was disliked by Bourguignat; in fact he considered all malacologists who criticized him as his enemies and this was also verbally expressed in a variety of his papers in hard terms. By doing so, and because of his radical ideas about the species concept, he became the ‘enfant terrible’ of malacol-

ogy. His ideas and his conflicts are well described by Dollfus (1902), Kuiper (1969), Dance (1968; 1970a+b), Bouchet (2002), Audibert, Backhuys & Breure (2016) and Audibert & Breure (2017).

Bourguignat was not only the leader of his Nouvelle École, but was also one of the founders of the Société Malacologique de France. He was the ‘Secrétaire général’ of the Society, and Article 10 of the Statutes ruled that only this position was elected for life. The society was founded on 1 January 1884, and ceased to exist on 3 April 1892 when Bourguignat passed away. The ideas of the Nouvelle École finally faded away about a decade later by the death of its proponents, such as Arnould Locard (1841-1904), Eugène Caziot (1844-1931), Paul Fagot (1842-1908), and Jules Mabille (1831-1904). The society published three journals (Tables 1-3). In two of these journals (Annales de Malacologie; Bulletins de la Société Malacologique de France) > 800 new species are described, the majority by followers of the Nouvelle École. The other journal (Revue Biographique de la Société Malacologique de France) was published in two volumes and contains portraits and descriptions of French malacologists (mainly the founders of the Société Malacologique de France as well as other followers of Bourguignat). The portrait of Bourguignat published in the first volume of the *Revue Biographique* is one of the two published portraits of Bourguignat. The other portrait has been published by Bouchet (2002: 6). We are aware of three other portraits, which are here reproduced, together with the two already known portraits (Figs 1-5).

Bourguignat published many papers between 1852 and 1892; his last paper is a tribute to himself, in which he described in 256 pages his malacological as well as his other achievements (being a list of his publications and taxa, accompanied with a summary of each paper). This publica-

tion is often attributed to Georges Servain (1846-?), but this disciple of Bourguignat is only responsible for the preface of that work. Although three exhaustive lists of the malacological publications of Bourguignat exists (Anonymus, 1885; Bourguignat, 1892; Dance, 1970b), as well as bibliographical papers on two of his publications (Dance, 1968; Backhuys, 1988), it is still difficult to get a correct bibliographic overview of his papers dealing on malacological items. This is highly problematic, as Bourguignat introduced > 2500 new taxonomic names, in a period that is considered the ‘Golden Age’ of malacology, in which many new species were discovered (Dance, 1986). The International Commission on Zoological Nomenclature produced from 1905 onwards a set of rules with the aim of ensuring that every animal has one unique and universally accepted name. Since one of the core rules is the Principle of Priority, bibliographic research is fundamental to achieve a solid foundation for zoological nomenclature. The goal of this paper is to provide a full overview of the malacological publications of Bourguignat. As a next step, an illustrated type catalogue will be produced by the first and last author of this paper, in order to decipher the identity of the many molluscan taxa that Bourguignat introduced. These taxon names can then be incorporated into MolluscaBase (<http://www.molluscabase.org/>), a Global Species Database covering all marine, freshwater and terrestrial molluscs, both recent and fossil (including synonyms), and which is hosted by the Flanders Marine Institute (VLIZ) at Oostende (Belgium).

The publications of Bourguignat are in various ways complicated. For example, he published a long series of papers under the title *Aménités Malacologiques* in the *Revue et Magasin de Zoologie*, and these papers were later published in issues in a two-volume book under the same

title (but both the pages and plates are renumbered in the book). The papers in the journal have priority over the parts in the book, but it should be noted that some plates were not published in the journal, but only in the book. In addition, there are a few Aménités Malacologiques that appeared in the book only. An additional complication is that the issues of the journal are not always dated correctly, and that the plates often do not occur together with the accompanying text, but in issues that appeared earlier or later than the text itself. As the plates are provided with a legend on the bottom, new names were sometimes introduced earlier than the original description. Extensive research was needed to allocate the plates to the original issue of the volume of the journal, since plates were as standard bound at the end of the volume, not at the end of the respective issue. With respect to the issues of the journal, there is no information on the wrappers other than the month and year. However, at the end of each issue often the meetings (séances) of that month are described, so that we are able to mention that the number of the journal was published after that date. If for example the meeting of 28

December is described, it is clear that the number can only be published earliest in January the year thereafter, and thus the publication date needs to be changed. Dickinson (2011: 242) postulated that it is very likely that the *Revue et Magasin de Zoologie*, like its predecessor the *Revue Zoologique de la Société Cuvérienne*, appeared the week after the month-end, which seems indeed the case if one takes the dates of the described meetings into consideration. This means that the December issue in fact routinely appeared in January the next year!

The Aménités Malacologiques was followed by a series of papers in the *Revue et Magasin de Zoologie* that were later bound together in a single book (that was not published in issues) under the title *Les Spicilés Malacologiques* (Bourguignat deliberately changed the accent from grave to égu, apparently because of the Latin pronunciation of spicilégium). In the *Spicilés Malacologiques* the journal has priority over the book, but as it is the case with the Aménités Malacologiques, (1) pages and plates are renumbered in the book, (2) some plates and some text parts were published in the book only, not in the journal, (3) the allocation

of the plates in the issues often do not coincide with the text, and (4) the issues of the journal are not always dated correctly. As an additional complication, the papers in the journal do not carry the heading *Les Spicilés Malacologiques*, and sometimes the title that appeared in the journal was changed in the book.

The third series of papers, known under the name *Mollusques nouveaux, litigieux ou peu connus* also appeared in the form of a book and in the *Revue et Magasin de Zoologie*. It differs from the first two series in that the book has priority over the journal. The book was published in 11 issues (décade 12 was published in the same issue as decade 11) between 1863 and 1870, and contains texts and plates that did not appear in the journal. As in the case of the first two series, there are problems with the allocation of the plates in the issues as well as with the publication dates.

Bourguignat published also in other journals, and in addition published many books and pamphlets by well-known publishers such as Baillière, Bouchard-Huzard,

Challamel, Masson, Savy and Tremblay. Several of these books were printed in limited numbers (100 or less), and are thus difficult to obtain in original. The work *Species novissimae Molluscorum in Europaeo systemati detectae* from 1876, in which 100 new 'species' were described, was printed in 25 copies only. A second part was planned in 1878 with the description of another 100 taxa, but this second part never appeared, although it is mentioned in the last work of Bourguignat (1892: 66-70), complete with the names of species 101 to 200. It is sometimes cited by others, apparently without seeing it (and not knowing that it did not exist). It was Connolly (1934) who finally exposed it as a Bourguignatian bluff (see also Llabador, 1970). On the wrappers of his privately published books and pamphlets or in the inserted selling catalogues some other works were repeatedly mentioned as being in print, sometimes complete with the number of plates. We found the following titles:

- “*La Pseudoconchyliologie, ou de l'ignorance du charlatanisme en matière malacologique*” (1 volume in-8 with

b/w plates). Mentioned on the backwrapper of his 1860 publication on Bretagne.

- “Études anatomo-physiologiques sur les Mollusques” (in-8, publié par fascicules. Sous presse le 1^{er} fascicule). Mentioned in a selling catalogue dated 1863 and attached to a part of the print run of *Malacologie du Lac des Quatre Cantons*. The same title is mentioned in a later selling catalogue enclosed in his 1864 paper *Malacologie d’Aix-les-Bains* as “In-4 avec pl. color, – chez J. B. Baillièrre et fils, libr.-édit., – paraissant par fascicules au prix de 6 fr.”
- “Histoire malacologique des Pyrénées” (1 volume in-8 with b/w and colour plates, to be printed in fascicules; price per fascicule 5 fr.). Mentioned in selling catalogue enclosed in his 1864 paper *Malacologie d’Aix-les-Bains*.
- “Histoire malacologique de la Syrie et de la Mésopotamie” (2 volumes in-4 with 60 b/w and colour plates; price 120 fr.). Mentioned in the selling catalogue enclosed in his 1864 paper *Malacologie d’Aix-les-Bains*.
- “Monographie du nouveau genre français *Macea*” (in-8 avec 2 pl. noires. Paris 1868). Mentioned inside back cover of *Souvenirs d’une exploration ... Parts 3 and 4*.
- “Lettres malacologiques. – Paris, in-8: 1^{re} 1867, 2^e 1869 (non livrée au public), 3^e, 4^e, 5^e 1882, av. 1 pl. n. lith.”. Mentioned on page 48 of the *Revue Biographique de la Société Malacologique de France* (Tome 1, 1883) as well as by Bourguignat (1892: 72). Only the first (1867) and the last three letters (1882; numbered 1-3) appeared!
- “Species novissimae Molluscorum in Europaeo systemati detectae, notis diagnosticis succinctis breviter descriptae. – Paris, in-8. 1^{re} centurie, juillet 1876; 2^e centurie, juillet 1878; 3^e centurie (sous presse)”. Mentioned on page 48 of the *Revue Biographique de la Société Malacologique de France* (Tome 1, 1885) as well as by Bourguignat (1892: 66). Only the first part appeared. The fate of the second part was discussed by Connolly (1934). The third part was not mentioned anymore in the bibliography written by Bourguignat (1892: 72).
- “Errorum in Kobeltanis operibus promulgatorum synopsis ou relevé critique des erreurs, des inepties, tant spécifiques que synonymiques, contenues dans les œuvres de M. Kobelt, de Francfort, par M. J.-R. Bourguignat. Pour paraître en Janvier 1884, la première centurie”. Mentioned on the back cover of *Lettres malacologiques 1883*.

- “Histoire malacologique du lac Tanganika (Afrique équatoriale). Tome 2” (Corbeil (Crété): vol. in-8, 20 plates) (“en cours de publication” – mentioned in Bourguignat, 1892: 162).

These are all ghost publications, but an interesting note is made by Bourguignat (1883: 18-19) regarding the “Histoire malacologique de la Syrie et de la Mésopotamie” in his malacological letter addressed to Spiridion Brusina (1845-1908). It is:

“J’avais, à cette époque, commencé, sur le modèle de mon ouvrage de l’Algérie, un travail général sur la faune de ces régions d’Asie. 37 planches in-4, admirablement lithographiées par le célèbre artiste Levasseur, étaient déjà terminées, ainsi que les tirages, lorsque je vins, par une sorte de fatalité, à recevoir de M. Albert Mousson, de Zurich, avec lequel j’étais alors en relation, quelques espèces nouvelles, dont ce savant m’annonçait se réserver la priorité.

Ces espèces se trouvaient justement déjà représentées sur mes planches.

Je ne pouvais dire à M. A. Mousson que la priorité de ces formes m’appartenait, parce que dans le cas où il n’aurait pas eu confiance dans ma parole, il aurait pu s’imaginer que je me servais de ce subterfuge pour lui subtiliser ses nouveautés.

Je n’avais donc qu’une chose à faire pour que le soupçon ne vint pas effleurer ma probité scientifique, à abandonner mon ouvrage sur la faune syrienne. C’est ce que je fis à mon grand regret, je l’avoue.

Or, les 37 planches sont chez moi, toutes tirées, depuis 1864. J’ai mieux aimé supporter une perte de 7, à 8,000 fr. que d’être soupçonné.

Comme, en définitive, vous pourriez ne pas ajouter foi à mes paroles, en même temps que je vous adresserai cette lettre, je vous ferai parvenir, sous pli recommandé, quelques exemplaires de mes planches d’*Helix*, de *Bulimes*, de *Cyclostomes*, d’*Unios*, etc., pour vous prouver la véracité de mon récit. J’ai déjà intercalé deux planches d’*Anodontes* d’Asie (pl. xiv et xv) dans le premier fascicule de mes *Matériaux* sur les *Acéphales* du système européen. Les malacologistes, auxquels j’ai adressé, en 1880, ce fascicule, ont pu se faire une idée de ce qu’aurait été cet ouvrage, que j’ai abandonné par un sentiment de délicatesse”.

In fact, not two but three plates (pls 13-15) were inserted in the 1880 fascicule of his *Matériaux* sur les *Acéphales*. These three plates are missing in the majority of the copies that we consulted. It seems that Bourguignat inserted these plates in a few copies only, which he distributed to the lucky malacologists that he contacted in 1880. The three plates are here

reproduced, from the personal copy of Falkner (Figs 6-8), as none of the electronically available copies contain these plates.

It was not the only financial loss that Bourguignat suffered. It was mentioned by him (1892: 58) that with respect to his work *Mollusques nouveaux, litigieux ou peu connus* the “décades XIII, XIV, et XV et XVI avec 12 pl. n. lithogr. qui devaient paraître en novembre-décembre 1870 et Janvier 1871 ont été détruites pendant les luttes de la Commune en mai 1871”. But Bourguignat was not a pauper; he did not have to work for his living when he discontinued his job as preparator after 1860. He probably inherited a lot of money and/or property from his first marriage; his first wife passed away when he was 29 (Dance, 1970: 71 footnote 16). It should also be noted that part of the plates published in *Revue et Magasin de Zoologie* were paid by himself as a service to his readers. Furthermore, most of his privately published books are printed on high quality paper, and his plates were illustrated by highly skilled persons such as Levasseur, Vaux-Bidon, Arnoul and others. The plates are regularly printed on wove paper (papier vélin) and often the chine-collé technique is applied which gives a different background colour and in which finer details from the drawing can be reproduced.

Not all works of Bourguignat are rare. His work on the Colline de Sansan (1881) was published in two different journals, and was also reprinted from these two journals. There are at least five different versions of this work, as described in detail by Backhuys (1988). Some other papers were translated in Spanish and published in the *Crónica Científica*.

Bourguignat’s magnum opus is without doubt his work on the land- and freshwater molluscs of Algeria. It was published in 6 fascicules encompassing two volumes and was accompanied with 58 plates. A bibliographic description of this work has been given by Dance (1968). However, it should be noted that fascicule 6 was not published in 1864, but late in 1865. Furthermore, the months as given on the wrappers do not always seem to be the months that it was actually released to the public, as one may conclude from the data mentioned in the *Bibliographie de la France* or *Journal de Conchyliologie*.

MATERIALS AND METHODS

We here present a bibliographic overview of all malacological works of Bourguignat. For clarity reasons, we have divided it into five parts: (1) single malacological publications authored by Bourguignat, (2) a collation of the *Aménités Malacologiques*, (3) a collation of the *Les Spicilées Malacologiques*, (4) a collation of the *Mollusques nouveaux, litigieux ou peu connus* and (5) contributions made by Bourguignat in works of other malacologists. All items were checked, mostly in original, and often by comparing several copies. Internet sources (such as the Biodiversity Heritage Library = <https://www.biodiversitylibrary.org/> and Gallica = <https://gallica.bnf.fr>) were consulted as well. Much effort was made to define the date of publication, for which various sources were used. The obtained information is, when available, mentioned under each bibliographic item.

As a reliable source for the dating of French publications we used the *Bibliographie de la France* (unfortunately, it excludes journals printed in parts). Printers in France were subjected to depository requirements (Dépot légal) and contributed weekly to the *Bibliographie de la France*. As this index was published on a weekly basis, the entries provided by the printer quickly became visible. Although the *Bibliographie de la France* is a rich source, printers sometimes failed to record a publication, or recorded it with substantial delay. We estimate that it took on average 4-6 weeks to record a work in the *Bibliographie de la France*, but there are notable exceptions (both positive and negative). Another very rich source, but less well-known, is the *Naturae Novitates*. This selling catalogue from R. Friedländer & Sohn (Berlin) started in 1879. It appeared twice a month, and each issue listed the titles in the field of Natural History that became available in the previous two weeks, not only from France but world-wide. To our surprise, for French works it was often as quick or even earlier as the *Bibliographie de la France*.

RESULTS

Single malacological publications authored by Bourguignat

- 1 BOURGUIGNAT, J.-R., 1852 [1 March]. Description d'une nouvelle espèce de *Pisidium*. — Journal de Conchyliologie, 3 (1): 47-51, pl. 1 figs 6-10. Paris.
- 2 BOURGUIGNAT, J.-R., 1852 [1 June]. Description d'une espèce nouvelle du genre *Pisidium*. — Journal de Conchyliologie, 3 (2): 174-176, pl. 8 figs 8a-e. Paris.
- 3 BOURGUIGNAT, J.-R., 1852 [≥ August]. Testacea novissima quae Cl. de Saulcy in itinere per Orientem annis 1850 et 1851, collegit. — 31 pp. Lutetiae [Paris] (J.-B. Baillière). Note: wrapper dated August 1852; Bibliographie de la France 11 September 1852 No. 5312.

- 16 BOURGUIGNAT, J.-R., 1862 [≥ April]. Les Spicilégés Malacologiques. Décembre 1860-Mars 1862. — Paris (J.-B.

- Baillière): VII + 287 pp., pls 1-15. Note (1): «Imprimé au nombre de 100 exemplaires par M^{ve} V^e Bouchard-Huzard»; Bibliographie de la France 14 June 1862 No. 4932; Journal de Conchyliologie, 10 (3): 287 = 23 July 1862. Note (2): Large parts of the text and the plates have previously been published in Revue et Magasin de Zoologie, the journal has priority over the book. See detailed collation below.
- 17 BOURGUIGNAT, J.-R., 1862 [± June]. Paléontologie des Mollusques terrestres et fluviatiles de l'Algérie. — Paris (J.-B. Baillière): pp. I-VIII + 9-126, pls 1-6. Note: «Imprimé au nombre de 100 exemplaires, à Paris, en mai 1862, par M^{me} V^e Bouchard-Huzard»; preface dated 15 May 1862; Journal de Conchyliologie, 10 (3): 300 = 23 July 1862; Bibliographie de la France 11 October 1862 No. 8847.
- 18 BOURGUIGNAT, J.-R., 1862-1863. Malacologie du lac des Quatre-Cantons et de ses environs. — Revue et Magasin de Zoologie, (2) 14 (11): 430-444 (> 24 November 1862); (2) 14 (12): 465-477, pl. 18-21 (> 29 December 1862 [= January 1893]; plates dated 1863); and (2) 15 (1): 5-26 (> 29 January 1863, see page 47). Paris. Note: also published 1863 as book: pp. I-VIII + 9-72, pls 1-4. Paris (J.-B. Baillière) [March?]. Note (2): «Imprimé au nombre de 100 exemplaires par M^{me} V^e Bouchard-Huzard»; wrapper dated November 1862; Bibliographie de la France 4 April 1863 No. 2911; reviewed in Journal de Conchyliologie, 11 (2): 219 (27 April 1863). Note (3): in all copies seen, a pamphlet (“En vente ouvrages scientifiques de J. R. Bourguignat (de Paris)”) is bound after the plates, with 1863 printed on page 8. Note (4): the journal seems to have priority over the book.
- 19 BOURGUIGNAT, J.-R., 1863 [March?]. Mollusques de San-Julia de Loria. — Paris (J.-B. Baillière): 34 pp., pls 1-2. Note: «Imprimé au nombre de 100 exemplaires, à Paris, en février 1863, par M^{me} V^e Bouchard-Huzard»; Bibliographie de la France 2 May 1863 No. 3845. Note: this paper (but without pages 33-34) was also published under the same title in: Revue et Magasin de Zoologie, (2) 15 (2): 49-63 (> 23 February 1863); (2) 15 (4): 150-160 (> 13 April 1863); and (2) 15 (5): pls 13-14 (> 22 June 1863). Paris. The preprint seems to have priority over the journal.
- 20 BOURGUIGNAT, J.-R., 1863-1870. Mollusques nouveaux, litigieux ou peu connus. Tome 1 (= «Première centurie (Mars 1863 à Décembre 1868)»): 324 pp., pls 1-45 (1863-1868); Tome 2 (= «Onzième et douzième fascicules»): 1-55, pls 1-4 (1870). — Paris (F. Savy). [«Imprimé à 100 exemplaires»]. Note (1): décade 1-10 = Tome 1; décade 11-12 = Tome 2. Note (2): Large parts of the text and the plates have been published in Revue et Magasin de Zoologie, but the book has priority over the journal. See detailed collation below; for the publication dates of the 12 décades see Table 6.
- 21 BOURGUIGNAT, J.-R., 1863-1865. Malacologie de l'Algérie ou histoire naturelle des animaux Mollusques terrestres et fluviatiles recueillis jusqu'à ce jour dans nos possessions du nord de l'Afrique. Note: wrapper dated May 1868; Bibliographie de la France 25 July 1868 No. 5892; *Revue et Magasin de Zoologie* (2) (10): 13 July 1868 (page 393).
- 34 BOURGUIGNAT, J.-R., 1868 [≥ July]. Note complémentaire sur diverses espèces de Mollusques et de Mammifères découvertes dans une caverne près de Vence. À propos d’une communication faite à l’Institut, à la séance du 13 juillet 1868, par M. Milne-Edwards. — Paris (M^{me} V^e Bouchard-Huzard): 12 pp. Note: page 12 dated July 1868; Bibliographie de la France 22 August 1868 No. 6694.
- 35 BOURGUIGNAT, J.-R., 1868 [December?]. Souvenirs d’une exploration scientifique dans le nord de l’Afrique, IV. Histoire des monuments mégalithiques de Roknia près d’Hammam-Meskhoutin. — Paris (Challamel aîné): 99 pp, 1 map, pls 1-9. Note: wrapper dated September 1868; Bibliographie de la France 6 March 1869 No. 1895.
- 36 BOURGUIGNAT, J.-R., 1869 [≤ October]. Catalogue des Mollusques terrestres et fluviatiles des environs de Paris à l’époque quaternaire. [Including an “Avis” of two pages by Belgrand.] — In: BELGRAND, F.E. (ed.), *Histoire générale de Paris. La Seine. I. Le Bassin Parisien aux âges antéhistoriques. Annexe*. — Paris (Imprimerie Impériale): Tit. + 32 pp., 3 pls. Note (1): Bibliographie de la France 9 October 1869 No. 8907 for the work of Belgrand; the Annexe by Bourguignat is mentioned on 30 October 1869 No. 9733. Note (2): This Annexe has been published in three different forms: (a) the sole contribution of Bourguignat, (b) in 2 parts in portfolio: the “Annexe” of Bourguignat and the “Coupes géologiques complémentaires” (3 col. folded plates with explanations) under the common title “Planches de géologie et de conchyliologie”, and (c) the Annexe of Bourguignat together with the geological plates 5-7 in one brochure without title page for the second part. Note (3): Bourguignat’s (1892: 29) correction of the publication date to 1870 («peu de temps seulement avant le siècle de Paris») is erroneous as can be seen from the entry in the Bibliographie de la France, perhaps Bourguignat referred to the delivery of his personal copies. Note (4): most of the original printing run was burned during the fire of the Paris Town Hall in May 1871 (see Bourguignat 1892: 29). Therefore the work was reprinted in 1883 with a different type setting and newly produced plates (see Bibliographie de la France 1 December 1883 No. 12549, with the remark that the item was received 17 November 1883). In this second edition the contribution of Bourguignat is incorporated in the second volume «Planches de paléontologie» and comprises pp. 5-34, but in the Table alphabétique (pp. 33-34) the page numbers of the first edition have been maintained. The three plates have been copied and newly lithographed

- by M. Gélibert and the quality of this unauthorized re-edition, which is much inferior to the first, was violently criticised by Bourguignat.
- 37 BOURGUIGNAT, J.-R., 1870 [April]. Aperçu sur la faune malacologique du Bas Danube. — *Annales de Malacologie*, 1 [1870-1884] (1): 36-76, pls 3-4. Paris. Note: journal dated April 1870; *Bibliographie de la France* 7 May 1870 No. 121. [Separatum: pp. 1-41, 2 pls, Paris (Bouchard-Huzard).]
- 38 BOURGUIGNAT, J.-R., 1870 [April?]. Description d'espèces nouvelles de Mollusques terrestres du département des Alpes-Maritimes. — Cannes (L. Maccarry): 21 pp. Note (1): wrapper dated 1869; *Bibliographie de la France* 2 July 1870 No. 5472. Note (2): this paper was also published under the same title in *Mémoires de la Société des Sciences Naturelles, des Lettres et des Beaux-Arts de Cannes et de l'Arrondissement de Grasse*, 1 [«1868»]: 45-59, Cannes (Maccarry). The title page mentions that the volume is for the year 1868, with 1869 given as publication date. However, 1 March 1870 is mentioned on page 114 and 120.

Fascicule 1: pp. 1-96, 1 unnumbered plate + pls XIII-XV; fascicule 2: pp. 97-387. — Poissy (S. Lejay). Note (1): on page 95 the plates XIII-XV are mentioned; these plates have indeed been published but are missing in most of the consulted copies (see also our introduction). These rare plates are included in our paper (Figs 6-8). Note (2): fascicule 1 and 2 are dated May 1880 and May 1881, respectively; fascicule 1 is recorded in *Naturae Novitates*, 2 (18): 146 = September 1880, whereas fascicule 2 is recorded in *Naturae Novitates*, 4 (6): 58 = March 1882. However, fascicule 2 is extensively cited by Locard (1882) throughout the main part of his monograph; his introduction is dated “septembre 1881”, so fascicule 2 must have been published in that year.

Collation of the Aménités Malacologiques

Note: The *Revue et Magasin de Zoologie Pure et Appliquée* (normally abbreviated as *Revue et Magasin de Zoologie*) was published 12 times a year. At the end of each issue the meetings of the ‘Académie des Sciences de Paris’ of that month are discussed and mentioned by date. Since the issues themselves are not precisely dated (only the month is mentioned), we have cited the latest date mentioned in the each issue. Interestingly, Dickinson (2011: 242) mentioned that it is likely that each issue appeared the week after the month-end, which was the case for its predecessor the *Revue Zoologique de la Société Cuvérienne*. We have accepted this for the December issue, with the consequence that issue 12 was published the next year (thus leading to changes in the publication year of the taxa introduced in issue 12).

The book itself is cited under item 7 (see above). The series *Aménités Malacologiques* is published in the *Revue et Magasin de Zoologie* as follows:

Collation of the Mollusques nouveaux, litigieux ou peu connus

Note: The two volumes comprise descriptions and illustrations of 120 species grouped in 12 sets, ten species in each set (or *décade*) (*décade* 1 = species 1-10; *décade* 2 = species 11-20; etc.). Part of the text and several plates were published in the *Revue et Magasin de Zoologie*, but most of the book is original and is not published elsewhere. The papers in the journal appeared later than the publication of the corresponding *décade*, so the book has priority over the journal (which is in contrast to the *Aménités Malacologiques* and the *Les Spicilégés Malacologiques*, where the journal has priority over the book). The *décades* 13, 14, 15 and 16 were destroyed during the Franco-Prussian War (Bourguignat, 1892: 58).

The book is cited under item 20 (see above). The series *Mollusques nouveaux, litigieux ou peu connus* is published in the *Revue et Magasin de Zoologie* as follows (for clarity reasons arranged per ‘*décade*’):

- 199 BOURGUIGNAT, J.-R., 1863. *Mollusques nouveaux, litigieux ou peu connus*. §1-§10. — *Revue et Magasin de Zoologie*, (2) 15 (3): 100-111 [> 16 March]; (2) 15 (4): pls 5-8 [> 1 May]. Paris. Note: 16 March mentioned on page 137; 1 May mentioned on page 173.
- 200 BOURGUIGNAT, J.-R., 1863. *Mollusques nouveaux, litigieux ou peu connus*. §11-§20. — *Revue et Magasin de Zoologie*, (2) 15 (5): 179-187, pls 18-19 [> 18 May]; (2) 15 (7): 252-261 [> 27 July]. Paris. Note: 18 May mentioned on page 196; 27 July mentioned on page 272.
- 201 BOURGUIGNAT, J.-R., 1864. *Mollusques nouveaux, litigieux ou peu connus*. 4^e *décade*. [§31-§40]. — *Revue et Magasin de Zoologie*, (2) 16 (6): 161-179, pls 11-13 [> 13 July]; (2) 16 (7): 193-212, pl. 14 [> 25 July]; (2) 16 (8): pls 15-16 [> 22 August]; (2) 16 (9): pl. 17 [> 19 September]; (2) 16 (11): pl. 18 [> 21 November]. Paris. Note: 13 June mentioned on page 190; 25 July mentioned on page 235; 22 August mentioned on page 270; 19 September mentioned on page 299; 21 November mentioned on page 359.
- 202 BOURGUIGNAT, J.-R., 1865-1866. *Mollusques nouveaux, litigieux ou peu connus*. §41-§50. — *Revue et Magasin de Zoologie*, (2) 17 (11): 337-347, pls 16-21 [≥ November 1865]; (2) 17 (12): pls 22-24 [≥ January 1866]; (2) 18 (1): 6-23 [> 22 January 1866]. Paris. Note (1): on page 363 of (2) 17 (11) the book of Figuié is discussed, The title page is 1866, but the work is mentioned in the *Bibliographie de la France* from 6 December 1865 (item No. 10806). Note (2): 26 December 1865 is mentioned on page 408, thus (2) 17 (12) has been published ≥ January 1866.
- 203 BOURGUIGNAT, J.-R., 1868. *Mollusques nouveaux, litigieux ou peu connus*. §81-§90. — *Revue et Magasin de Zoologie*, (2) 20 (10): 369-384, pls 14-16 [> 12 October]; (2) 20 (11): 422-433 [> 9 November]. Paris. Note: 12 October mentioned on page 409; 9 November mentioned on page 443.
- 204 BOURGUIGNAT, J.-R., 1870. *Mollusques nouveaux, litigieux ou peu connus* [§101-§110]. — *Revue et Magasin de Zoologie*, (2) 22 (1): 14-30, pls 14-15. Paris. Note: 10 January mentioned on page 32.
- 205 BOURGUIGNAT, J.-R., 1870. *Mollusques nouveaux, litigieux ou peu connus* [§111-§120]. — *Revue et Magasin de Zoologie*, (2) 22 (3): 87-97 [> 14 March]; (2) 22 (5): 166-171, pls 16-17 [> 2 May]. Paris. Note: 14 March mentioned on page 113; 2 May mentioned on page 182.

Contributions by Bourguignat in works of other malacologists

It should be stressed that in many papers Bourguignat was attributed as the author of newly established species by others, but according to the rules of the Code not only the name, but also the description should come from the same person. That was often not the case, and as consequence the author of the paper should be considered the author of the new taxon name. This is often overlooked, even in recent times (e.g. in Sitnikova, Kijashko & Sysoev, 2012). Here we only cite papers in which Bourguignat contributed to the text itself.

Mollusques terrestres, des eaux douces et des eaux saumâtres. — Lyon (Henri Georg): vi + 462 pp. Note (1): June 1882 mentioned on page 451; *Bibliographie de la France*: 12 August 1882 No. 8122; *Naturae Novitates*, 4 (17): 157 = August 1882. Note (2): published later under the title «Prodrôme de malacologie française» in the *Annales de la Société d'Agriculture, Histoire Naturelle et Arts Utiles de Lyon*, (5) 4 [“1881”]: 189-748. Lyon (1882) [*Naturae Novitates*, 4 (25): 229 = December 1882]. The preprint appeared earlier. The following was contributed by Bourguignat: most of the text on pages 301-367 and 451-458.
- 213 SERVAIN, G., 1882 [± July]. Histoire malacologique du lac Balaton en Hongrie. — Poissy (S. Lejay): 125 pp. + Errata [1 p.]. Note: although the paper by Servain is dated 1881 (page 7 dated June 1881; wrapper dated 1881), it has been published in 1882 (*Naturae Novitates*, 4 (18): 171 = September 1882; *Malakozoologische Blätter, Neue Folge*, 6 (2): 181, 197 – book review written by Hazay on 5 November 1882), perhaps in July. On the back wrapper of a publication of Bourguignat (1881) on the genus *Pechaudia*, dated June 1881 but published ± September 1881, the paper of Servain was mentioned as “pour paraître prochainement”. The following was contributed by Bourguignat: pp. 24-30: «Aperçu monographique des Strigelles d'Europe»; pp. 44-65: «Catalogue des Limnées d'Europe»; pp. 86-90: «Notice monographique sur les espèces du genre *Segmentina*». In the text itself no titles or headings are given; the above titles are taken from Bourguignat (1892: 114-116).
- 214 SERVAIN, G., 1882 [± September]. Histoire des Mollusques acéphales des environs de Francfort. — Poissy (S. Lejay): 68 pp. Note with respect to publication date: introduction dated July 1882; wrapper dated August 1882; *Naturae Novitates*, 4 (25): 231 = December 1882; *Malakozoologische Blätter, Neue Folge*, 6 (2): 181-182, 197 – book review written by Hazay on 5 November 1882. The following was contributed by Bourguignat: pp. 15-18: “Rivicoles”. In the text itself no titles or headings are given; Bourguignat (1892: 120-121) cites it as “Sphériques européennes du groupe du *Sphaerium rivicola*”.
- 215 LOCARD, A., 1883 [± March]. Contributions à la faune malacologique française. III. Monographie du genre *Lartetia*. — Lyon (Pitrat aîné): 24 pp., 1 plate (“1882”). Note (1): *Naturae Novitates*, 5 (7): 64 = April 1883; *Bibliographie de la France*: 19 May 1883 No. 5075. Note (2): published later in the *Annales de la Société Linnéenne de Lyon*, (N.S.) 29 [“1882”]: 189-210. Lyon (1883) [*Bibliographie de la France*: 23 June 1883 No. 6322; *Nat. Novit.*, 5 (13): 125 = July 1883]. The preprint appeared earlier. The following was contributed by Bourguignat: validation of *Lartetia rayi* (page 22-23, pl. fig. 11-12; name + description + figure provided by Bourguignat).
- 216 BÉRENGUIER, P., 1883 [± July]. Essai sur la faune malacologique du département du Var. — Draguignan (C. & A. Latil): 106 pp. Note (1): although the paper by Bérenguier is dated 1882 (page 103 dated 11 December 1882; wrapper dated 1882), it has been published in 1883 (*Naturae Novitates*, 5 (15): 146 = August 1883; *Bibliographie de la France* 10 November 1883 No. 11647). Note (2): this is a preprint of the paper later published (1885) in the *Bulletin de la Société d'Études Scientifiques et Archéologiques de la Ville de Draguignan*, 15 [1884/1885]: 5-103, 105-115 (Addenda & Corrigenda = Chapitre VIII), 117-118 (Table). The Addenda & Corrigenda have been preprinted under its own title [Malacologie du Var. Addenda et Corrigenda] and pagination [13 pp.] in 1883 [page 13 dated 21 August 1883]. Note

- (3): the 5 (unnumbered) Planches photographiques have been delivered in 1884 or later. Note (4): among the species figured on the “Planches photographiques” are *Bythinella Berenguieri* and *Unio Berenguieri*; these plates were not published in the journal. The following was contributed by Bourguignat: pp. 99-103: description of *Bythinella Berenguieri* and *Unio Berenguieri*.
- 217 PECHAUD, J., 1884 [± May]. Excursions malacologiques dans le Nord de l’Afrique, de la Calle à Alger, et d’Alger à Tanger. 1^{re} fascicule. — Paris (Jules Tremblay): 112 pp. Note (1): although the paper by Pechaud is dated January 1883, it has been published in 1884 (Bibliographie de la France 28 June 1884 No. 7025; *Naturae Novitates*, 6 (13): 141 = July 1884; *Zoological Record* 1884: 9), perhaps in May. Note (2): the text on the last page (112) stops in the middle of a sentence. It was announced that the work would be published in 4 parts (fascicules) with 8 plates, but only the first part has been published (without plates). Pechaud deceased in 1886. The following was contributed by Bourguignat: pp. 5-7: «Nouvelle Espèce de *Letourneuxia*, notice sur ce genre et classification des Arionidae»; pp. 18-27: «Revue critique des Hyalinies constatées dans le Nord de l’Afrique»; pp. 54-64: «Recensement critique et descriptif des *Helix* du groupe de la *lactea*»; pp. 85-94: «Étude sur les Hélices bidentées du Nord de l’Afrique»; pp. 95-110: «Examen critique des Hélices de la série des *Rerayana* et de celle des *Balearica*». In the text itself no titles or headings are given; the above titles are taken from Bourguignat (1892). It should be stressed that the manuscript of Pechaud is preserved in the personal library of Bourguignat in Geneva; interestingly, the entire memoir is in Bourguignat’s own handwriting (Connolly, 1934: 71; Dance, 1970: 75-76, pl. 3).
- 218 SIMON, E., 1884 [7 May]. Arachnides observés à Miranda-de-Ebro au mois d’août 1883. — *Anales de la Real Sociedad Española de Historia Natural*, 13 (1): 113-129. Madrid. Note: wrapper dated 7 May 1884; *Naturae Novitates*, 6 (13): 137 = July 1884. The following was contributed by Bourguignat: pp. 126-127: «Note sur les mollusques ... recueillis dans la même localité par M. E. Simon».
- 219 LOCARD, A., 1889 [± June]. Contributions à la faune malacologique française, XIII. Revision des espèces françaises appartenant aux genres *Margaritana* et *Unio*. — Paris (J.-B. Baillière): 163 pp. [Introduction dated April 1889; *Bibliographie de la France*: 13 July 1889 No. 7769; *Naturae Novitates*, 11 (14): 231 = July 1889]. Note: published later under the title “Contributions à la faune malacologique française. [XIII]. Catalogue des espèces françaises appartenant aux genres *Margaritana* et *Unio* connues jusqu’à ce jour” in the *Annales de la Société Linnéenne de Lyon*, (N.S.) 35 [“1888”]: 112-269. Lyon [Introduction dated April 1889; *Bibliographie de la France*: 1889 No. 13129; *Naturae Novitates*, 11 (24): 377 = December 1889; *Zoologischer Anzeiger*, 12 (324): 662 = 30 December 1889]. The preprint appeared earlier. The following was contributed to Bourguignat: description of *Margaritana pyrenaica* and a variety of *Unio* taxa dispersed between pages 75 and 147.
- 220 LOCARD, A., 1890 [± August]. Contributions à la faune malacologique française. XIV. Revision des espèces françaises appartenant aux genres *Pseudanodonta* et *Anodonta*. — Paris (J.-B. Baillière): 240 pp. [Introduction dated July 1890; *Bibliographie de la France*: 27 September 1890 No. 9874; *Naturae Novitates*, 12 (19): 414 = October 1890]. Note: published slightly later under the title “Contributions à la faune malacologique française. [XIV]. Catalogue des espèces françaises appartenant aux genres *Pseudanodonta* et *Anodonta* connues jusqu’à ce jour” in the *Annales de la Société Linnéenne de Lyon*, (N.S.) 36 [“1889”]: 49-284. Lyon [Bibliographie de la France: 25 October 1890 No. 11185; *Naturae Novitates*, 12 (21): 442 = November 1890]. The preprint appeared earlier. The following was contributed to Bourguignat: description of several *Pseudanodonta* taxa dispersed between pages 87 and 104.

ACKNOWLEDGEMENTS

The authors greatly acknowledge the support of Yves Finet, Emmanuel Tardy and Jean Mariaux (all Muséum d’Histoire naturelle Genève, MHNG), who are in charge for the major part of the collection of Bourguignat and his private library. In the Paris Museum (MHNH) Philippe Bouchet and the librarian of the Bibliothèque de Malacologie, Pierre Lozouet, gave free and liberal access to the very complete collection of Bourguignat’s publications that had been formed by Arnould Locard. This study was made possible by the financial support of the Naturhistorisches Museum der Burgergemeinde Bern (NMBE) and GBIF.Ch hosted by the Centre Suisse de Cartographie de la Faune (CSCF), Neuchâtel, Switzerland.
